EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.
2. Authorization for this examiner's amendment was given in a telephone interview with Thomas Otterlee on 11/23/2009.
3. The application has been amended as follows:
 - a. The word "directly" has been added between the words "positioned" and "above" in line 13 of claim 1 and line 12 in claim 31.
 - b. The phrase "without necessitating movement of the drive mechanism" has been added after the word "portion" (last word in claim) in line 14 of claim 1.
 - c. The word "directly" has been added after the word "is" at the end of line 9 in claim 31.
 - d. The phrase "without necessitating movement of the drive mechanism" has been added after the word "belt" (last word in claim) in line 13 of claim 31.
 - e. Claim 29 has been restricted (as discussed below) and is hereby cancelled.
4. The following is an examiner's statement of reasons for allowance: the prior art of record (considered as a whole) neither anticipates nor renders obvious a head for a suction cleaner with a housing, a rotatably mounted tool element within the housing and

Art Unit: 3727

a drive element with a drive mechanism, the drive mechanism including a drive belt that does not pass around the tool element and the external surface of the drive belt directly engages the tool element to drive the tool element, wherein no portion of the drive mechanism is positioned directly above the tool element to allow the tool element to be removed from the housing in an upward direction without needing to move the drive mechanism in combination with the rest of the limitations set forth in the independent claims. Although there are several prior art invention having a rotatable tool element in a vacuum head that is driven by an external surface of a drive belt, all of the prior art references have at least a portion of the drive belt extending directly over the tool element such that the tool element is not removable without requiring some movement of the drive belt or other parts of the drive mechanism.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Election/Restrictions

5. This application contains claims directed to the following patentably distinct species: Species 1 is represented by Figures 9-13 and Species 2 is represented by Figure 7. The species are independent or distinct because claims to the different species recite the mutually exclusive characteristics of such species. In addition, these species are not obvious variants of each other based on the current record.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are considered to be generic.

There is an examination and search burden for these patentably distinct species due to their mutually exclusive characteristics. The species require a different field of search (e.g., searching different classes/subclasses or electronic resources, or employing different search queries); and/or the prior art applicable to one species would not likely be applicable to another species; and/or the species are likely to raise different non-prior art issues under 35 U.S.C. 101 and/or 35 U.S.C. 112, first paragraph.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species to be examined even though the requirement may be traversed (37 CFR 1.143) **and (ii) identification of the claims encompassing the elected species**, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

The election of the species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the election of species requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are

Art Unit: 3727

added after the election, applicant must indicate which of these claims are readable on the elected species.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the species unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other species.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141.

6. During a telephone conversation with Thomas Otterlee on 11/23/2009 a provisional election was made without traverse to prosecute the invention of Species 1, claims 1, 4-6, 8-14, 16-19, 21-26 and 31-33. Affirmation of this election must be made by applicant in replying to this Office action. Claim 29 is hereby withdrawn from further consideration (and cancelled in order to allow the pending claims reading on elected species 1) by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

Art Unit: 3727

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to BRYAN R. MULLER whose telephone number is (571)272-4489. The examiner can normally be reached on Monday thru Friday 8-5.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Monica S. Carter can be reached on (571) 272-4475. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
